

skool.com from Intel, a member of the Intel Learning Series Alliance

skool.com is a high quality award winning free e-learning service supported by Intel® Corporation in 30 countries and 12 languages around the world

World-leading skool™ Learning and Teaching Technology

Intel have collaborated with governments, education ministries, agencies, non-government organizations, expert teachers and local technology companies around the world to adapt and implement skool in 30 countries in Europe, Asia, the Middle East, Turkey, Latin America and Africa. In 2009 five million users from around the world visited skool.com websites or used skool.com learning and teaching resources in the classroom.

skool.com won the United Nations World Summit on the Information Society Award in 2003 recognizing the excellence and creativity of the initiative. The award particularly recognized the contribution of the open and free skool.com resources to societies and learners throughout the world.

Multiple language programme

Programmes implemented in **12 major world languages** using the existing skool multi-media content library can also be adapted for local dialect, local accent and native languages. Dual language versions can also be implemented.

Award winning Primary and Secondary mathematics and science

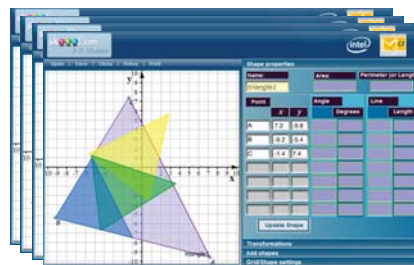

- **Over 400 multimedia resources** for mathematics, physics, chemistry and biology at Primary and Secondary level. We use a curriculum alignment process to align the content to each national curriculum and local teaching practice base, covering the maths and science subjects for US grade-equivalent 4-10.

- **Award Winning Advanced Toolkits**

for open ended learning.

The UK BETT award winning Mathematical Toolkit and Numberline Tool developed with the UK Mathematical Association, and the Physics Experimental Toolkits developed with Ireland's Junior Science Support Services.

- **Skool football**

to improve Maths and Science skills.

The backdrop of a football environment is designed to present the material in a unique, engaging and challenging format for students. The activities while based around football themes are universal and related to real world learning scenarios.

- An extensive **Study note library** to support revision and exam preparation.

- **MYskool™ download tool** allowing download for narrowband environments or for mobile offline use.
